IRON ORE FOUND IN EASTERN KWANGTUNG

A group of prospectors from the Liang-kuang Geological Survey Laboratory who have just returned from a 4-month survey in eastern Kwangtung report a bed of magnetic iron ore of excellent quality at T'ieh-shan-chang.

Unfortunately, because of poor communications, the industrial facilities of Hsing-ning, which is located in this area, cannot be utilized in exploiting the newly discovered deposit. However, it is proposed that the three deposits of good-quality magnetic iron ore discovered at Yung-ho-yu (5 miles east of Hsing-ning) be developed to supply Hsing-ning industry.
